SUMMARY

CS undergrad at Symbiosis Institute of Technology (2024–2028) specializing in LLM application development and agentic AI systems. Hands-on experience shipping production-grade RAG pipelines, multi-agent workflows, and full-stack AI applications using LangGraph, FastAPI, and Next.js. Oracle Cloud Infrastructure 2025 Certified Generative AI Professional.

EDUCATION

Bachelor of Technology in Computer Science, Symbiosis Institute of Technology 2024 – 2028
Pune, Maharashtra CGPA: 8.2 / 10

SKILLS

Languages	Java, JavaScript, Python, C, C++
AI & ML	LangChain, LangGraph, CrewAI, RAG, Transformers, NLP PyTorch, Deep Learning, HuggingFace
Frameworks	React, Next.js, Node.js, FastAPI, Express, Tailwind CSS
Databases/Cloud	PostgreSQL, MongoDB, Pinecone, Supabase, Convex, Azure, AWS
Tools	Git, Vim, MCP (Model Context Protocol), Google ADK

PROJECTS

DataMind (MergeAI) <i>Next.js, FastAPI, PostgreSQL, LangGraph, Azure OpenAI</i>	GitHub
- Engineered a natural language-to-SQL platform allowing users to securely query multiple PostgreSQL databases, accelerating non-technical data retrieval time by up to 80%. - Architected an agentic workflow using LangGraph to handle database schema extraction, SQL generation, and validation, achieving 95%+ query syntax accuracy on complex multi-join operations. - Implemented real-time execution tracking with Server-Sent Events (SSE) to stream live LangGraph execution steps to the React frontend with sub-500ms latency.	
Echo: AI Customer Support System <i>Next.js, Express, Convex DB, Pinecone, Groq</i>	GitHub
- Developed a scalable full-stack customer support platform, handling concurrent chat sessions across a Next.js dashboard and an embeddable Vite React widget. - Engineered a Retrieval-Augmented Generation (RAG) pipeline leveraging BAAI embeddings and Pinecone, delivering sub-800ms documentation retrieval latency. - Integrated Socket.IO and Convex DB to facilitate seamless real-time handoffs from AI agents to human operators, resolving tier-1 support queries autonomously 70% of the time.	
Brand Guardian AI <i>React, FastAPI, Azure Video Indexer, Azure AI Search, WebSockets</i>	GitHub
- Built an automated video compliance auditing pipeline that processes media, extracting speech transcripts and OCR text, reducing manual review time by over 85%. - Utilized LangGraph and Azure OpenAI to cross-reference video content against vectorized corporate compliance PDFs, catching 95%+ of brand guideline violations. - Designed a real-time observability interface using WebSockets to monitor the backend pipeline's progress, logging live state transitions for videos of up to 10+ minutes seamlessly.	
Autonomous Multi-Agent Trip Planner <i>Python, CrewAI, Serper API</i>	GitHub

- Designed a collaborative multi-agent system using CrewAI featuring specialized roles, generating fully personalized 7-day travel itineraries in under 2 minutes.
- Incorporated dynamic web search via Serper API and custom calculator classes to enforce accurate, data-driven budgeting, reducing planning discrepancies by 40%.
- Orchestrated complex logistical tasks from destination filtering to day-to-day scheduling, managing 10+ concurrent search and synthesis processes dynamically.

Multimodal RAG Pipeline | *Python, Tesseract OCR, Poppler, ImageMagick, Qdrant*

GitHub

- Constructed a context-aware data ingestion pipeline leveraging Tesseract OCR, Poppler, and ImageMagick to extract textual layout context from 100+ page PDFs with high fidelity.
- Synchronized robust analysis of visual formats to prime data for vectorization, increasing multimodal LLM retrieval accuracy by over 30% compared to standard text-only RAG setups.

POSITIONS OF RESPONSIBILITY

- **AI/ML Coordinator**, Google Developer Student Club (GDSC), SIT Pune2024 – Present
 - Organize AI/ML workshops, study jams, and hands-on sessions for 100+ student members.
 - Led peers in project-based learning initiatives around LLMs, RAG pipelines, and applied ML.
 - **Coordinator**, Cyber & Blockchain Club, SIT Pune2024 – Present
 - Coordinate club events, hackathons, and technical sessions covering cybersecurity and blockchain fundamentals.

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** – OracleSep 2025
 - **The Web Developer Bootcamp 2025** – Udemyaug 2025
 - **AI Engineer Path** – ScrimbaJul 2025
 - **Hashgraph Developer Course** – Swirlds LabsApr 2025
 - **Open Source Models with Hugging Face** – DeepLearning.AIMar 2025
